# Remote Monitoring & Management Capabilities

## CyberPower®
### Reliability. Quality. Value.

**RMCARD203**

**RMCARD202**

CyberPower Remote Management RMCARD is an optional choice to be added to any of the Smart App UPS systems and Emergency Power Systems (EPS) for remote management and configuration of the device via standard web browsers or network management system (NMS). Administrator can access, monitor and perform remote management including scheduled-shutdown, startup and reboot; multiple alert notification by e-mail, SMS, and SNMP messaging; flexible event action setting; event logging and data logging. With its Hot Swapping Capability, the systems can remain 100% uptime and availability for connected equipment when performing installation or replacement.

## Series Features

- Real time UPS/EPS monitoring
- Remote management and configuration of UPS/EPS via Web Browser or NMS
- Auto-shutdown to protect servers/workstations from data loss due to power failure
- Hot-swappable (Plug-n-Play)
- Schedule shutdown/start-up/reboot of the UPS via remote control
- Event logging to track UPS operational history
- Data logging for analyzing power conditions
- Event notification via email, SMS and SNMP trap
- HW2.0 Supports TCP/IP, UDP, SNMP V1/V3, Http/Https, NTP, Telnet, DNS, SMTP,IPv4/v6 protocols[*]
- SNMP MIB provided
- Quick installation and user friendly interface
- User upgradeable firmware via FTP
- Security management provided
- 10/100 Mbps Ethernet Compatible
- Better deployment with PowerPanel® Business Edition Software
- Support ENVIROSENSOR to monitor temperature and humidity (RMCARD203 only)
- MD5 security management

*HW1.0 supports TCP/IP, UDP, SNMP V1, HTTP, NTP, Telnet, DNS, SMTP, IPv4 protocols

## Compatibility
- Office Rackmount Series UPS
- Professional Series UPS
- Emergency Power Systems (EPS)
(selected series may not be available in your region)

| Remote Management | Real-time Monitoring |
|---|---|
| Multiple Alert | Hot-Swappable |
| Event/Data Logging | Auto-Shutdown |

**Graphic Web Interface**

| Model | RMCARD202 | RMCARD203 |
|---|---|---|
| Remote Management | HTTP, NMS | |
| Auto Shutdown | Workstations, Multiple Servers | |
| Upgradable User Firmware | v | |
| Auto Event Notification | E-mail, SMS, SNMP TRAP | |
| Remote Scheduling | Shutdown, Startup, Reboot | |
| Ethernet Speeds (Mbps) | 10/100 | |
| Auto Shutdown Clients | 50 | |
| ENVIROSENSOR Compatible | N/A | v |

CyberPower® works with Cisco on the latest version of EnergyWise™ Compatibility. Go to http://www.cpsww.eu/products/pdu/cisco_disclaimer.htm for complete disclaimer.

**CISCO™ Compatible**

### POWERPANEL® BUSINESS EDITION S/W

#### Auto-shutdown Software
PowerPanel® Business Edition Management Software, is compatible with Windows8, 7, Vista, XP, 2000, Windows Server 2012, 2008, 2003, VMware Esxi, Citrix Xenserver, Linux and Mac.

*Software functions may vary due to firmware version and/or hardware constraints.*
